AutoCAD Crack +

AutoCAD Activation Code drawing information is separated into different classes called standard objects. These are the standard objects which are specific to AutoCAD in each drawing: AutoCAD adds 3D entities in a drawing for the purpose of creating information visually. These are similar to standard objects, but are not used in the command-line version of AutoCAD, which uses command blocks. Arc entities are used for 3D geometry in a drawing. Geometries are used to represent two-dimensional figures. Inventories contain a list of equipment that is used to define property settings and to control how the object or property is displayed. For example, an inventory may contain a list of acceptable 3D models that can be used for a 3D object. Parameters are parameters that are used to display a property or control how a property behaves. Symbols are used to define symbols, dimensions, text styles, dimension styles and viewports. Viewports are display surfaces, such as screens, windows, 2D plans, etc. Text is used to display text. ObjectARX ObjectARX is a C++ class library from Autodesk that allows for users to extend AutoCAD functionality to specific fields. Autodesk currently offers a number of Autodesk-based plugins for AutoCAD, such as AutoCAD Architecture, AutoCAD Electrical, AutoCAD Civil 3D, AutoCAD MEP and AutoCAD LT. These plugins can run on Windows, Mac OS X and Linux platforms. Autodesk's Connected Objects in CAD software plugin can be used to expand AutoCAD functionality to programs such as Revit. All these programs use ObjectARX for the API's. AutoCAD's DXF, drawing exchange format, allows importing and exporting drawing information.
