All slots were used 1-3 times between the 10/1/12 and 2/1/14 versions. Having deleted the game, however, the corrupt files still appeared. I could load the game using the supplied executable and i could play the game for about 10 minutes until the game would crash, with a blank screen. The only software I ran was my anti-virus(Norton 360). I have tried to extract the files with RAR and using WinRAR, both failed. I also tried to extract the files with WinZip(a trial version and open version). I did install CCleaner pro to clean up my computer, again after this I was unable to extract the files. I have tried to follow this guide and i was unable to run the installation program. I really have no idea what is wrong. My friend has another computer with the same version of GTA4 installed on her computer. On her computer she has no problem extracting the files so I assumed it would not be a problem on mine. Thanks in advance for the help A: The first thing I'd recommend is using a different tool to "extract" the data. I would use 7zip. It has great functionality and is fairly small. If you must use a different archiver, I would recomend WinRAR. It's free, easy to use and has a unique set of features that make extracting a lot of types of files very easy. (see their feature list.) There is a tutorial on extracting from the RAR archive, and it works. On the other hand, I would not recommend using WinZip. I think it's a fine tool for things like ZIP files, but the other formats are easier to work with in RAR. If you do go with 7zip, make sure you get the free trial version, and use it to extract the game disc, then install it on your computer and make sure it's compatible. "One of the great things about Greek food is that you can do it a little bit in your home." Stamatis Ioannou says one of his greatest joys is cooking and sharing food. It was on this principle that he developed his line of "Smart Cooking" products. Ioannou (pronounced ee-ah-no) grew up in a large family
