Musik Box Lawsuit box buku ende hkbp shop music box When i try to compile I get the following error: Cannot open included file: box.h. I have opened the file and it seems like it is all about paths. But the paths aren't set from the beginning.. How can I resolve this problem? A: I was able to compile my code by just including the basic includes(windows.h, stdio.h, stdlib.h) and removing the others. Also the compiler was complaining about a unknown identifier in windows.h which was there to tell it that windows is the operating system. #include Q: Django model fields and modelforms I'm trying to learn Django from this book. In chapter 4, pg 56, it says: One useful technique for developing a form is to create a form for each model that you would like to create. To do this, create a file called forms.py in the top-level folder of your Django app, and add the following code: from django import forms class AuthorForm(forms.ModelForm): class Meta: model = Author fields = ['name','surname',] class BookForm(forms.ModelForm): class Meta: model = Book fields = ['name', 'author',] Also, if I have a model called Author like that: class Author(models.Model): name = models.CharField(max_length=80) surname = models.CharField(max_length=80) And in forms.py from django.forms import ModelForm class AuthorForm(ModelForm): class Meta: model = Author fields = ['name','surname',] class BookForm(ModelForm): class Meta: model = Book fields = ['name', 'author',] When I ran manage.py
