## **AutoCAD Crack+ Download PC/Windows**

On March 21, 2004, Autodesk changed the name of the AutoCAD Product Key R12 product from "AutoCAD Crack Keygen" to "AutoCAD LT". The name change was intended to emphasize the fact that AutoCAD LT was intended for smaller applications, including mechanical and electrical, that were no longer considered AutoCAD class work. The software costs the same as before, however. Autodesk released AutoCAD LT 2009, in February 2009. The update included several enhancements and bug fixes, including improved support for Windows Vista. The following AutoCAD LT 2010 evaluation pages present a quick overview of the 2010 release. Additional details can be found in the AutoCAD LT 2010 help system. The 2010 version of AutoCAD LT introduces the new drawing/model-selection (or "Tool") option. This feature works just like it does in AutoCAD and allows you to choose which drawing or model to be created from which drawing, or save drawings/models as new drawings. However, it's only included in AutoCAD LT 2010, so you can't use it in this version of AutoCAD. The New Drawing/Model Option allows you to create new drawings or models from other drawings or models. To use the feature, open a drawing and follow the steps below. The New Drawing/Model option has two modes: New Drawing and New Model. The New Drawing mode creates a new drawing from the open drawing and saves it under a new name. The New Model mode creates a new model from the open drawing and saves it under a new name. Opening a New Drawing/Model In the DWG file, double-click the New Drawing/Model option. A dialog box opens with two options: New Drawing and New Model. Drag and drop the first option (such as New Drawing) onto the drawing/model. The option is automatically saved under a new name. Drag and drop the second option (such as New Model) onto the drawing/model. The option is automatically saved under a new name. A dialog box opens with a drawing name and a model name. Click the Save button to open the Save As dialog box and save the drawing under a new name. Click the Save button to save the model under a new name. The New Drawing/Model option creates a new drawing. In this view, the drawing is the default open drawing.
