This game gives me a whole new level of gaming enjoyment. I've been a fan of Fantasy games for a while and I'm always on the lookout for new titles, but nothing has compared to the awesomeness that this game brings to the table. Games like this, while too rare, are the games that we all crave to play. You want to ask, "Is it possible that the fantasy world would be this much fun?" This game would leave you wanting more. Fantasy games have hit a creative slump for so long now, but that's about to change. While the war between the army of light and the army of darkness rages on, there's a new force that knows how to wield arms and magic. The Elden Ring. This game combines so many different styles into one, it could only work. What we have here is a game that you can actually play through, and not just play through and feel like you should get to the end of the story. What a refreshing change! It is usually only the devs who enjoy the game and have fun playing it through. The story of this game is superbly written and the backstories for the characters are great fun to read about and explore. I love when characters play out roles that you had always suspected they would! It's like piecing together the puzzle and seeing all the connections that make the story come together. Can you tell that I love this game? Oh but, enough talk, let's get to the real deal! I want to focus on the components of this game. The first is that I say the camera is awesome. While I've had problems with other games making some decisions for me to really make the best of the game, the camera in this game is just perfect. It's not huge and takes control of your screen, but it's not so small that you don't ever get to see what you're looking at! The second component that I wish to touch on is the graphics. They look a bit low-res, but it was actually a nice surprise when I saw the menu. Each of the character models are unique and have their own unique look and feel. I thought that it was nice that they didn't try to dress the characters up like they would in a more "realistic" game. The game is also absolutely beautiful. The world is a sight to behold, and the backgrounds are quite detailed. Although it feels like a low bfff6bb2d33

The biggest map that has ever been made is in the the game. It has and incredibly expansive world, and although the main story is linear, other than the fact that there's some time constraints to do certain things, the world is in no way linear. I got this game for my birthday, and I've been playing it since then. If you've never heard about it, go check it out. Its been worth the 700 dollars, even though the game wasn't what I was expecting. It was light on the role playing, but that's ok. The main point of the game is to go through it and get every single piece of equipment. Obviously do a lot of the optional side quests, even though what you need for the main story is worth a slight discount. It's called The Elder Scrolls: Oblivion, and the guys at Bethesda understood that the best thing to do was to make the most map out of your iphone. Go to this forum, and have a listen to all the music that this amazing game has came with, Awesome stuff! Grandma had an issue... she needs a bandaid. What kind of mistake did the old woman make?
