History The first version of AutoCAD was an add-on for the former CADDesk, based on the WinG code base for the GIS (Geographical Information Systems) Geographic Information System version 2.0 (GIS 2.0). The initial programming of AutoCAD was done by GIS consultant, Steve Oliver, and the add-on was marketed by Oliver's company, Dataquest, in 1989. AutoCAD was a standalone product from AutoDesk until 1996, when it was bundled with the first release of AutoCAD 2000. By October 1999, with AutoCAD 2000 and 2000 Design Suite, the company had released an estimated \$1 billion worth of software. AutoCAD 2006 was the first product from Autodesk that used the.NET platform. Version 2005 was the first release of the product that could be used on computers without a CD/DVD drive. In 2008, the first Autodesk plugin for Google SketchUp was released. It allowed AutoCAD and AutoCAD LT users to insert 2D and 3D objects directly into Google SketchUp. In 2009, Autodesk launched AutoCAD 360. It provides users the ability to interact with their CAD model on mobile and tablet devices. In December 2009, Autodesk partnered with VMware and released a viewer for Autodesk Vault. It allows users to access a company's 3D CAD content from the VMware View client and mobile device. On August 5, 2010, Autodesk released AutoCAD 360 App for Android. It allows AutoCAD users to access their model from anywhere. The app can use AutoCAD LT, AutoCAD, AutoCAD R12 and AutoCAD 3D; AutoCAD R18 is not supported. On June 30, 2011, Autodesk released AutoCAD 360 mobile. Autodesk also released AutoCAD mobile for Android and iOS. The iPhone application was released later in 2011, and AutoCAD 2012 for Android and iOS. Autodesk released AutoCAD 360 App for Windows 8 and Windows RT. On March 12, 2012, Autodesk launched AutoCAD 360 Architectural Designer. The application allows architects to share, view and discuss 2D and 3D architectural drawings from anywhere. On April 30, 2013, Autodesk launched an add-on called Visual LISP. Vancouver police officers were called to the girl's school on Jan. 13 to respond to a complaint about a verbal and physical attack against a teacher, police said in a news release. The girl's mother had told the mother of the teacher, who had posted a message on Facebook, "I'm not sorry I did it," according to a letter of apology from the teacher. The attacker's post prompted thousands of abusive comments, including: "I hope you get raped in prison." Police said in their release that by the time officers arrived, the woman had left the school. "She was irate and became upset because she wanted to clear her name," police said. "The person she attacked was not her." Police said the victim and the attacker's mother worked together in health care and that the woman's mother called the girl's mother. "The mother of the attacker offered to do anything to make it right," the news release said. The police investigation concluded that the teacher's post was "inappropriate and unprofessional" but it did not find the girl responsible, police said. The attacker later posted on social media: "Took me a little while but I finally found her! Thanks to everyone who helped me out!" In response to the police investigation, the attacker posted: "Sorry I was so rude on social media, if I had known what was going to happen, I would have been more careful." The victim's mother and the teacher's mother told CTV News
