

in the mid-2000s, dolby labs introduced a new audio technology that was called dolby atmos. at that time, there was no such thing as a dolby atmos speaker. but the number of dolby atmos titles that were being released and dolby atmos speakers being sold, the consumer needs were being met. about the time that the consumer needs were being met, dolby labs started to make the dolby atmos speaker. it took about a decade for the dolby atmos speaker to finally hit the market and the consumer had better options than the previous technology. the dolby atmos speaker has now been out for almost a decade and it has provided the consumer with better than the previous technology. it has become an important part of the consumer's home entertainment experience. hi jonathan, i have a denon heos 3, and i have a 7.2.2 atmos album on flac, and the sound is very good, however, the quality of the sub is not good as with the previous versions of the heos system. is there anyway you can share your setting for better quality on the 7.2 atmos albums? thank you for your help. when i click play in the dolby app and go to the rest of my media i have no sound other than the dolby logo. i can hear the dolby logo. i just get the dolby logo. so theres no sound coming out of my speakers. i cannot get dolby atmos to work with my onkyo tx rz800. i am using dolby access software. i have the dolby atmos trailers downloaded but cannot play them. i try to open them and they open fine but as soon as i click play it freezes up and i have to end the app. please help me.
